

BEADOS

Magically join with water!

No mess, no fuss Beados!

For immediate release

May 2008

The Beados No Mess Desk has everything you need to make your Beados creations with no mess!

You and your mum will love making Beados designs without spilling any beads! You can also pack them up quickly and securely into the No Mess Desk when you have finished.

Safely store all your Beados beads in the no mess container that releases beads one-by-one. Then pick up your beads with the Beados Tweezers to place them on the tray. Spray your design and watch the beads magically join together!

The best part is that you will never lose a bead! Watch as all your excess beads fall into the clever bead catch area surrounding your bead tray.

This fantastic new addition to the Beados range is available in July at all good toy stores and retailers. For ages 4 and up RRP \$34.99
