

Tips: Trouble Shooting

- If beads get stuck in base remove bead tray and bead storage and tilt the base up at the back.
- Turn fan off after use
- If fan slows down replace batteries
- If the fan does not work, check that the batteries have been correctly inserted.

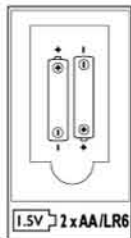

Battery Loading

1. Ensure the fan is turned off. Using a Phillips head screwdriver remove the screw. (Fig.1)
2. Remove the battery compartment door. (Fig.2)
3. Insert 2AA batteries into the Battery chamber. Check that the (+) and (-) on the battery are aligned according to the polarity information shown on the contact plate. (Fig.3)
4. Replace the Battery Compartment Door and replace screw.

Battery

- Alkaline batteries recommended.
- Do not use rechargeable batteries.
- Non-rechargeable batteries are not to be recharged.
- Different types of batteries, or new and used batteries are not to be mixed.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries should be replaced by an adult.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the product.
- The supply terminals are not to be short-circuited.
- Batteries are to be removed from the product when not in use.
- Do not dispose of batteries in fire.
- (2 x AA /LR6) not included.
- Keep instruction for future reference.
- Protect the environment by not disposing of this product with household waste. Check your local authority for recycling advice and facility.

Beados Design Tips

- Placing near open window or fan will speed up drying time.
- If the Beados beads after spraying are not stuck together, respray and allow to dry.
- To make the design stronger spray water on reverse side of final design.
- Place your dried Beados designs underneath a book to flatten designs.
- Make sure your hands are dry when touching the beads. If wet beads stick to fingers please wash hands with soap and water.

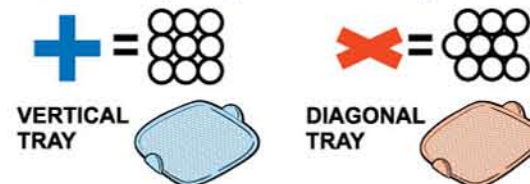

- Wash tray well after use with warm soapy water and dry before next use.
- Too much water will not join the Beados together-please remember to lightly spray the beads.
- When using the 3D mould tray it is best to spray in between each row and wait overnight or until completely dry for best results.

Design Difficulty

Trays

Make sure template symbol matches tray colour.

How to use Suction Pen

1. Gently squeeze the suction pen as shown and position the pen nib on the desired bead colour you need to pick up.

2. Release the pressure and the suction pen will hold the bead.

3. To place your bead in the desired position, gently squeeze the pen and the bead will be released.

Remove beads from trays

1. Gently squeeze the suction pen and position the pen on the desired bead you need to remove.
2. Release the pressure and the suction pen will hold the bead so you can remove it.

NON TOXIC

BEADOS

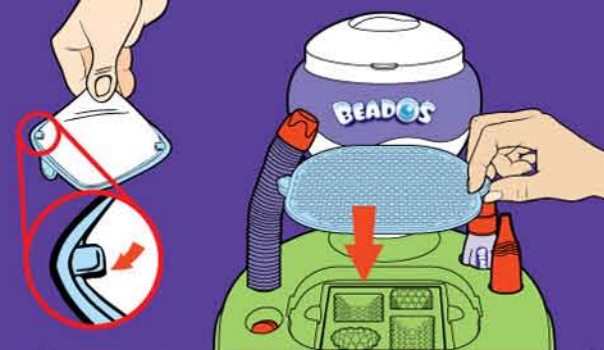

Magically join with water!

3D SUPER STATION INSTRUCTIONS

How To Begin

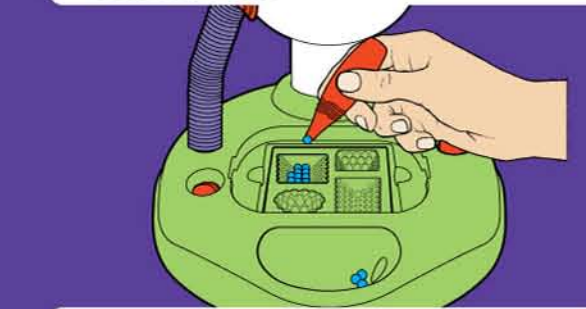

1 Place template into the tray as shown and insert tray into base over the 3D blister mould.

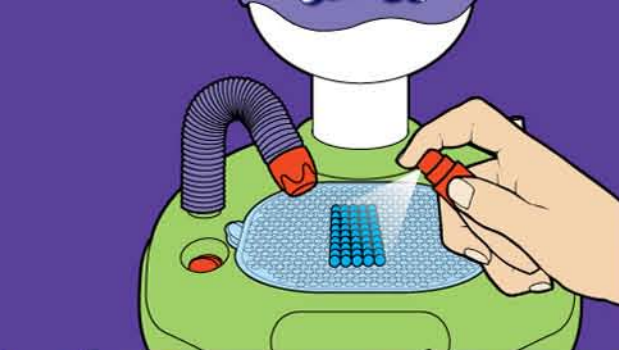

2 Turn the bead storage so the chosen bead is facing the front.

3 Push down on bead storage as shown to release beads into the bead dish at the front of the unit.

4 Using the suction pen place the beads into the tray or 3D mould tray as shown.

5 Holding your sprayer 10cm away from design evenly spray your complete design. Approx 2-4 sprays. Allow 10 - 15 minutes to dry before removing.

6 Position the nozzle towards your wet design and turn the switch to on. Allow 5-10 minutes to dry before removing.

WOW!
Look at all the Beados
Designs you can make!

DO NOT PLACE BEADOS IN MOUTH. CONTENTS AND COLOURS MAY VARY. IMPORTANT: PLEASE RETAIN THE PACKAGING AND INSTRUCTION SHEET. THEY CONTAIN VALUABLE PRODUCT INFORMATION. DO NOT DISCARD. ADULT SUPERVISION OF YOUNG CHILDREN IS RECOMMENDED. AS THE BEADS CONTAIN A BITTER TASTE, IT IS ADVISED TO WASH HANDS AFTER USE.
