Beados Design Tips

- Too much water on design will make the beads sticky and requires a much longer drying time.
- The surface of the design should be dry to touch before removing from tray.
- Gently sliding a card underneath the design will help remove it easily.
- Leave design to dry overnight for a stronger join.
- Placing near open window or fan will speed up drying time.
- Remember to close all beads storage lids before lifting up to carry.
- To make the design stronger spray water on reverse side of final design.
- Place your dried Beados designs underneath a book to flatten designs.
- Make sure you hands are dry when touching the beads. If wet beads stick to fingers please wash hands with soap and water.
